GET TO KNOW OUR DIAMONDS

CVD DIAMOND
CHEMICAL VAPOR DEPOSITION

Lab-produced, it has the same physical and chemical properties as a natural diamond, applied to the clinical tips and burs of the CVDentus® portfolio.

- High durability;
- Greater resistance;
- No soft tissue cuts;
- Cutting of rigid structures;
- Procedures with less bleeding;
- Precision;
- Ecologically friendly;
- Biocompatible.

DLC DIAMOND
DIAMOND LIKE-CARBON

It is a thin carbon film with physical-chemical characteristics close to those of diamond, applied to metallic and non-metallic surfaces, present in implant and surgical tips.

- Greater durability;
- Bactericidal effect;
- Easy to clean;
- Reduced friction coefficient;
- Chemically inert material;
- Lower likelihood of bone necrosis;
- Thermal resistance up to 400 °C;
- High mechanical strength;
- Biocompatible.

CVD DIAMOND GRIT SIZES

Another CVDentus® exclusive is the **grit size variations** - produced to add quality to your clinical routine. Check the characteristics of each one:

EXTREME
ULTRA FINE - UX

Ideal for finishing or the stage prior to polishing.

ULTRA FINE - U

Performs the refinement of the preparation.

FINE - F

Ideal for fine wear.

COARSE

Performs controlled wear.

EXTREME
COARSE - XR

Ideal for heavy wear.

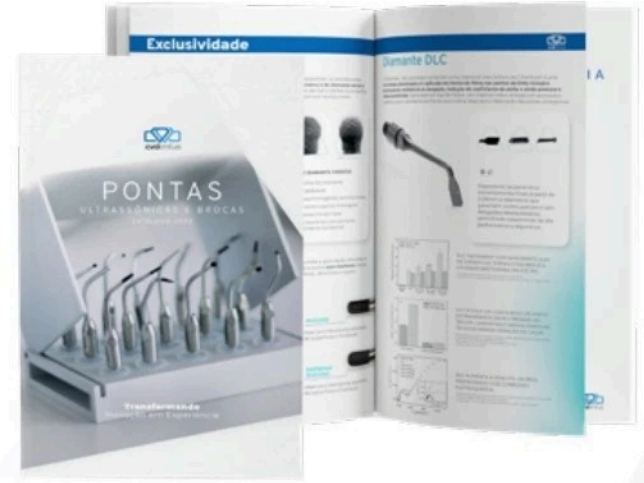

TECHNOLOGY CREATED BY THOSE WHO KNOW THE SUBJECT

Developed by renowned professionals and professors, the CVDentus® tip portfolio includes different shapes, with variations in diameter, cuts in type, mesial and distal, among other variations, to serve all dental specialties.
