MEET OUR LOUPES

GALILEO LINE

Ultra-Light Design and Dynamic Focus

Ideal for those seeking versatility and a wide field of view for routine procedures.

- **Magnification:** 2.5x and 3.5x.
- **High Transparency:** Lenses that keep focus even while moving.
- **Extreme Comfort:** The lightest in its category (30g to 50g).
- **Total Adjustment:** Flip-Up system with full interpupillary adjustment.
- **Indication:** All clinical specialties.

KEPLER LINE

High-Performance Prismatic Optics

Designed for specialists who demand extreme detail and higher magnifications.

- **Magnification:** 4.0x to 6.0x.
- **Internal Prisms:** Flat, sharp image from edge to edge.
- **Surgical Precision:** Ideal for locating canals and microfractures.
- **Stability:** Ergonomic design that reduces visual fatigue.
- **Indication:** Endodontics, Implantology and precision Prosthodontics.

ERGO LINE

The Revolution in Clinical Ergonomics

The only one that lets you work in a 100% neutral posture, protecting your cervical spine.

- **Magnification:** 3.5x to 6.5x.
- **Deflection Prisms:** View the work field without tilting your neck.
- **Occupational Health:** Eliminates neck pain and extends your career.
- **Maximum Comfort:** Available in TTL (custom-made) and Flip-Up systems.
- **Indication:** Long-duration surgeries and prevention of postural injuries.

GALILEO

MODEL
TTL

The **Galileo** line is the ideal choice for the dentist who wants the **maximum field of view** with the lightness needed for everyday practice. Thanks to its **high transparency**, it keeps focus with precision, even during clinical movement.

Magnification:
2.5x and 3.5x options.

Dynamic Focus:
High optical transparency that preserves sharpness in motion.

TTL Versatility:
Through-The-Lens mounting (hole in the lens) for the maximum field of view.

Flip-up Versatility:
Fully adjustable (tilt and pupillary distance). Can be flipped up when not in use.

Optical Compatibility:
CVDentus loupes are fully compatible with prescription lenses. The structure allows your vision correction to be integrated directly into the equipment, a service that should be performed at an optician of your choice after purchasing the loupe.

Feature	TTL Version	FLIP-UP Version
Weight	30g - 50g	45g – 60g
Working Distance	300mm – 580mm	340mm – 550mm
Field of View (2.5x)	90mm	85mm
Field of View (3.5x)	85mm	80mm
Depth of Field	Up to 300mm	Up to 300mm

Indication:
Customized design and modular technology: change the magnification by replacing only the optical set.
Indicated for all specialties: Implantology, Periodontics, Endodontics, Restorative Dentistry, Prosthodontics, Oral and Maxillofacial Surgery, Orthodontics, Pediatric Dentistry.

MODEL
FLIP

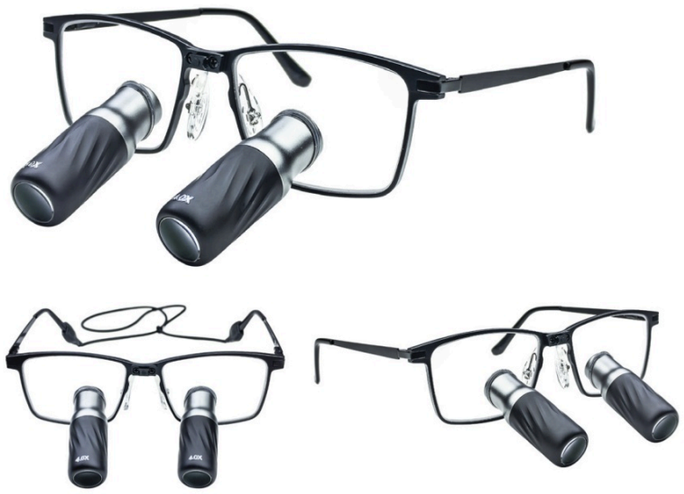

KEPLER

MODEL
TTL

The **Kepler** line is built with high-fidelity **internal prisms**, designed for professionals who perform complex procedures where every detail counts. It delivers a flat image with absolute sharpness out to the edges, eliminating peripheral distortion.

Magnification:
4.0x, 5.0x and 6.0x options for viewing microstructures.

Prismatic System:
Advanced optics that deliver greater brightness and clarity, even at high magnifications.

Visual Stability:
Keeps the image steady and sharp, essential for long procedures.

Mounting Versatility:
TTL: Optimized for the lowest weight and widest field of view in its category.
Flip-up: Total flexibility with precise manual adjustments (pupillary distance and tilt).

Lightweight for Its Class:
Only 50g to 74g – one of the lightest prismatic loupes on the world market. Compatible with prescription glasses; mounting at an optician of your choice.

Feature	Kepler TTL (Custom-Made)	Kepler Flip-Up (Adjustable)
Weight	50g – 70g	55g – 74g
Working Distance	360-460mm 440-540mm	360-460mm 440-540mm
Field of View (4.0x)	70mm - 80mm	60-75mm
Field of View (6.0x)	45mm - 55mm	50mm - 65mm
Depth of Field	4.0x - 110 - 130mm 6.0x - 50 – 80mm	4.0x - 60mm - 75mm 6.0x - 70mm - 80mm

MODEL
FLIP

Indicated for High Precision
The definitive choice for specialties that demand a “microscope view”:
Customized design and modular technology: change the magnification by replacing only the optical set.
Endodontics: Locating calcified canals and microfractures.
Implantology: Surgical and peri-implant esthetic precision.
High-Precision Prosthodontics: Marginal adjustments and esthetic refinement.
Oral and Maxillofacial Surgery: Detailing in complex reconstructions.

ERGO

MODEL
TTL

The **Ergo Loupe** represents the greatest advance in **ergonomics** in modern dentistry. Using optical deflection prisms, it lets the professional view the work field while keeping a fully neutral posture (straight neck). It is the definitive solution to prevent and eliminate neck and lower back pain.

Maximum Magnification:
Available from 3.5x up to 6.5x, combining ergonomics with high surgical precision.

Unique Deflection Angle:
You look straight ahead, but the loupe sees downward. Say goodbye to excessive neck tilt.

Professional Longevity:
Developed specifically to extend the useful life of the dentist's career, avoiding time off due to postural injuries.

Mounting Versatility:
TTL: Optimized for the lowest weight and widest field of view in its category.
Flip-up: Total flexibility with precise manual adjustments (pupillary distance and tilt).

Ultra-Light Design:
Extreme comfort for long procedures, without excessive pressure on the nose bridge. Compatible with prescription glasses; mounting at an optician of your choice.

Feature	Ergo TTL (Pure Posture)	Ergo Flip-Up (Flexibility)
Magnification	3.5x – 6.5x	3.5x – 6.5x
Working Distance	360-460mm 440-540mm	360-460mm 440-540mm
Field of View (3.5x)	80mm	77mm
Field of View (4.5x)	70mm	65mm
Field of View (5.5x)	50mm	47mm

MODEL
FLIP

Ergo Highlights:
Customized design and modular technology: Change the magnification by replacing only the optical set.

Dentists with chronic pain: In the neck, shoulders or back.
Long-duration surgeries: Where maintaining posture is critical.
Visionary professionals: Who want to invest today in tomorrow's health.
High-complexity procedures: That demand high magnification without sacrificing comfort.

WHY BUY
A **CVDENTUS** LOUPE?

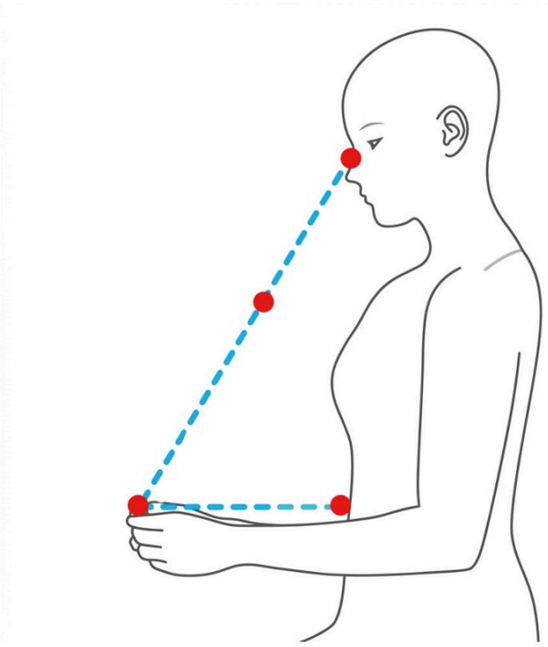

PRECISE DIAGNOSIS:

Reduces the rate of incorrect **diagnosis** and ensures quality treatment. Conveys a more **professional** image to the patient. **The right magnification** allows the user to capture more precise details, from **2.3x** closer up to **7 times closer.**

ERGONOMICS & POSTURE

Work Position Optimization: Using the loupe forces the professional to keep an adequate working distance, naturally correcting the seated posture. **Spine, Neck & Vision Protection:** Preserves your vision by eliminating visual strain and also provides a sharp view without the need for excessive tilt; the equipment drastically reduces the curvature of the cervical and lumbar spine. **Injury Prevention:** An upright posture minimizes muscle tension, preventing chronic pain and occupational diseases that can compromise the longevity of a career.
