PRODUCT CATALOG

MORE DURABILITY, FEWER REPLACEMENTS

Elo Line tips have arrived to revolutionize your procedures, with more comfort for the patient and more durability for your practice.

COMPATIBLE WITH THE MAIN ULTRASOUND UNITS

FITTINGS D, E & N

ULTRASOUND TIP

T1T

Ideal for prophylaxis and supragingival scaling

IDEAL FOR

- Prophylaxis and supragingival scaling;
- Cleaning of plaque and heavy calculus;
- Periodic maintenance and routine appointments;
- Clinics seeking performance with affordable investment.

KEY FEATURES

- Gentler procedures, with lower risk of enamel wear;
- Easy sterilization and maintenance, preserving the integrity of the instrument;
- Excellent cost-benefit ratio,

FITTINGS D, E & N

ULTRASOUND TIP

T1UX

Ideal for subgingival and supragingival scaling and root planing

IDEAL FOR

- Subgingival scaling and root planing;
- Calculus removal in periodontal pockets;
- Routine periodontal maintenance;
- Patients with sensitivity

KEY FEATURES

- Does not scratch tooth enamel;
- Less vibration, more efficiency in calculus removal;
- Homogeneous surface and greater durability.
- Significantly reduces sensitivity (CVD DIAMOND)

TECHNICAL GUIDE TO FITTINGS

Conventional Ultrasound Units:

FITTING D

Cav Flex
D700
Dabi
Dabi Atlante Profi Neo
Dabi Ceramic
Gnatus Jet Sonic Total
Prof I e Prof III
SAEVO

FITTING E

ALT
Driller
Emissonic (MMO)
EMS (Mini Piezon, PM 100, PM 150, PM 200, PM 250)
Gnatus with red ring on the handpiece
Kavo (Kavo Sonico does not fit)
Kondortec
Mectron
Microdont (Advanced S and SEL)
Ortus, Scaler Jet, W&H, Woodpecker

FITTING N

Acteon Satelec, Gnatus Jet Sonic, VT150
Adiel Plus, VDW, Ultradent, SAEVO
Advanced SE, Spartan, Shuster
DMC, Ortus Import, Olsen
DTE, NSK, J Morita, Gnatus
Easy Sonic, GG Dent

WARRANTY AND SUPPORT

Buying from the Elo Line is buying with confidence

7 DAYS

Compatibility Guarantee

If the tip does not fit your device, we replace it at no cost, with no red tape.

90 DAYS

Factory Warranty

Full coverage against manufacturing defects, directly from the manufacturer.

100% BRAZILIAN

Fast and Human Support

A team ready to truly assist you,
no bots, no run-around.

TECHNOLOGY THAT CAME FROM NASA

Our diamond is pure, grown in the laboratory
as a single stone, from start to finish

30X

MORE DURABLE THAN COMMON DIAMOND-COATED TIPS ON THE MARKET

Grows as a single stone (monocrystalline),
with no weak points between grains

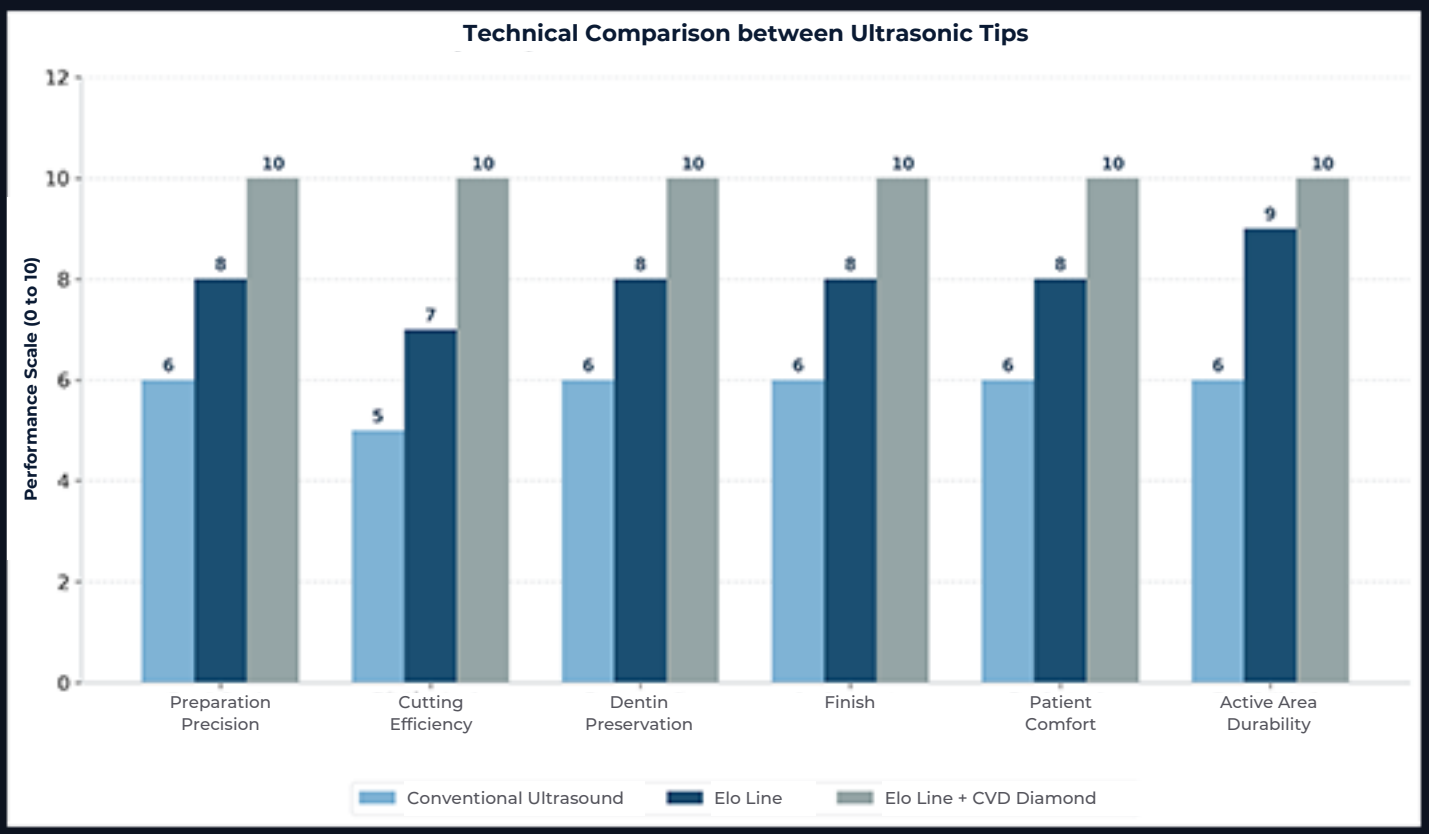

Significantly reduces sensitivity
during the procedure

**ELO TIPS DO NOT JUST REMOVE TISSUE;
THEY PRESERVE THE TOOTH.**

The combination of CVD diamond and ultrasound promotes a gentler preparation, with less heating, less damage to dentin and better sealing of the restoration. The result is a more comfortable treatment for the patient, with lower incidence of postoperative sensitivity and greater clinical predictability.

WHY DOES THE ELO LINE OFFER A SUPERIOR CLINICAL EXPERIENCE?

The evolution of dental ultrasound does not depend only on the equipment, but mainly on the technology of the active tip. The Elo Line with CVD diamond combines the precision of piezoelectric ultrasound with the strength and efficiency of CVD diamond, providing more precise cuts, less tissue trauma, greater patient comfort and a potential reduction in postoperative sensitivity.

WHY CHOOSE
THE ELO LINE?

MORE DURABILITY
Lab-grown CVD diamond,
up to 30x stronger

GUARANTEED COMPATIBILITY
Fits the main ultrasound
units on the market

REAL WARRANTY
7 days of compatibility +
90 days of factory warranty

NATIONAL SUPPORT
A human team, ready
to assist you
