KNOW OUR DIAMONDS

CVD DIAMOND

CHEMICAL VAPOR DEPOSITION

Produced in the lab, it has the same physical and chemical properties as a natural diamond, applied to clinical tips and burs in the CVDentus® portfolio.

- High durability;
- Greater resistance;
- No injurie soft tissue;
- Rigid structures cut;
- Procedures with less bleeding;
- High precision;
- Sustainable;
- Biocompatible.

DLC DIAMOND

DIAMOND LIKE-CARBON

It is a thin carbon film with physicochemical characteristics close to those of a diamond, applied to metallic and non-metallic surfaces, present in our surgical tips.

- Greater durability;
- Bactericidal effect;
- Easy cleaning;
- Friction coefficient reduction;
- Chemically inert material;
- Less bone necrosis;
- Thermal resistance up to 400˚C;
- High mechanical strength;
- Biocompatible.

CVD DIAMOND GRANULOMETRIES

Another CVDentus® exclusivity are the **granulometry variations** - produced to add quality to your clinical routine.

Check out their features:
